Title: Write a program in C that creates a child process, waits for the termination of the child and lists its PID.

```
sayeum@sayeum:~/new/hello$ nano exp9.c
sayeum@sayeum:~/new/hello$ gcc exp9.c
sayeum@sayeum:~/new/hello$ ./a.out
Before fork
I am child having id 3124
My parent's id is 3123
COMMON
My child's id is 3124
I am parent having id 3123
COMMON
sayeum@sayeum:~/new/hello$ ▮
```
